DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 1/5/05, and has been entered and made of record. Currently, claims 2, 3, 5, 6, 8, 9, 11-19, 21, 22 and 24-34 are pending.

Specification

2. The corrected or substitute specification was received on 12/22/04. The specification is acceptable.

Allowable Subject Matter

- 3. Claims 2, 3, 5, 6, 8, 9, 11-19, 21, 22 and 24-34 are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

The prior art of record do not teach or suggest the limitation of a control method for a data communication apparatus wherein the history holding step of holding a execution history of the second notification step for each of a plurality of communication partners including the partner apparatus and the control step of controlling which of the first and second notification steps is executed on the communication with the partner apparatus.

Further, the prior art of record do not teach or suggest the limitation of a control method for a data communication apparatus for determining whether the multilevel

image data satisfies the second condition when multilevel image data is data based on the first condition.

The most relevant prior art, the combination of Kanemitsu (U.S. Patent No. 6,674,548) and Nobuta (U.S. Patent No. 5,956,162), teaches the limitation of receiving both monochrome image and multilevel image based on the receiving capability notified by the receiver. Thus, when the capability is notified to the transmitter, the transmitter sends the image data accordingly. However, the prior art does not disclose the limitation for determining whether the multilevel image data satisfies the second condition when multilevel image data is data based on the first condition.
